Jun Zhu

Professor
National Engineering Research Center for Nanotechnology

Date of Birth: Sep. 12, 1979
Place of Birth: Jiangsu, China
E-mail: yzjzhu@163.com

Education: Doctor, Shanghai Jiao Tong University
Experience: National Engineering Research Center for Nanotechnology
Research Areas: Molecular Imaging
Awards: First Class Prize for Shanghai Scientific and Technology Progress, Second Class Prize for Scientific and Technology Progress of state Education Ministry of China

Interview

Q1: What are the major current research activities in your group?

A1: Molecular imaging.

Q2: When did you get interested in the specific field? Could you please tell us more about your research in this respect?

A2: Molecular imaging enables the visualisation of the cellular function and the follow-up of the molecular process in living organisms without perturbing them. The multiple and numerous potentialities of this field are applicable to the diagnosis of diseases such as cancer, and neurological and cardiovascular diseases. This technique also contributes to improving the treatment of these disorders by optimizing the pre-clinical and clinical tests of new medication. They are also expected to have a major economic impact due to earlier and more precise diagnosis.

Q3: What is the most important personality in scientific research?

A3: Fantasy and practice.

Q4: What is your motto?

A4: Everything will pay off.

Q5: Who is the person you admire the most?

A5: Isaac Asimov.

Q6: What is your hobby?

A6: Reading popular science knowledge.

Q7: What would you be if you were not a scientist?

A7: A trainer of imagination.

Q8: What are the most important things you learned from your parents?

A8: Social responsibility.

Q9: What is the best advice you have ever been given?

A9: Developing science and technology thinking education in middle school.

Q10: What is your most favorite book/music/movie/food/city?

A10: Asimov on science fiction/The Night with Pure Moon and Beautiful Flowers in Spring/Avatar/Egg Fried Rice/Yangzhou.
